Bobcat of the Quad Cities features quality products and convenience for customers

Customers in the Quad Cities know that when it comes to light equipment, they need turn no further than to Bobcat of the Quad Cities. A division of Rexco Equipment, the Bobcat of the Quad Cities store is located next to I-280 in Davenport.

The large store carries an extensive inventory of Bobcat skid steers, compact track loaders, versahandlers, tractors and more. It also carries Kubota tractors and mowers and eXmark mowing equipment.

"Bobcat, Kubota and eXmark have always been industry leaders in the light equipment market," said Branch Manager and Rexco Vice President Ron Sebastian. "Our customers know their reputation and the quality that goes into these products. Many have used Bobcat equipment for 30 years or more. So they know they're getting a great product and that Bobcat of the Quad Cities will back it up."

A full-service facility, the Bobcat of the Quad Cities store not only sells quality equipment, but offers rentals, provides parts and accessories and has outstanding service. Smaller equipment, such as generators and compressors, is available at the store as well. When customers come into the store they'll see equipment, parts and accessories on display.

Committed to reducing downtime

The store has large service bays to handle any type of equipment Bobcat of the Quad Cities carries, as well as competitive brands. All work is performed by highly skilled technicians, who will come to a customer's jobsite if needed. A large parts inventory is available with common parts items on hand to keep downtime to a minimum.

"It's always our aim to continue improving our parts and service capabilities," said Sebastian. "We're a small company, so we can offer the personal touch, but we're also big enough to handle any needs customers have. We're committed to taking care of them as quickly as possible."

Bobcat of the Quad Cities is located next to I-280 in Davenport. Its location is convenient for customers to come and see the large inventory of equipment and parts, as well as bring machinery in for service.
